

# 800L Wall Tank

## 800L Wall Tank

A durable, premium quality tank for garden rainwater storage. The original and class-leading design.

Slim and sleek simple design, yet with a small space saving footprint. It is specified by professionals where bulk storage and a compact footprint are required.

Used in Fire Water and other professional markets.

Has three inset brass connectors at 3/4", one tap point and two for further tank or pump attachment (please note that the tap is not included and can be purchased separately).

Fill with filtered rainwater from the 3P Filter Collector (supplied separately).

Supplied with metal retention bracket, holesaw and rubber grommet sealing ring for 3P Filter Collector.

Blue Grey Granite: 9000550K

Granite: 9000510K

Green: 9000530K

Sand: 9000520K

## Easily Expandable

Increasing your rainwater harvesting capacity is simple with the 3P Wall Tank. To connect multiple tanks, just install a 3P Tank-to-Tank Connector using the lower 3/4" ports.

Add a Garden Steel Pump with Handle and Pump to Tank Connector for a resilient garden irrigation system or vehicle washdown system (see 3P Reseller Catalogue).

The 3P Filter Collector attaches to the downpipe and is securely fitted into the Wall Tank. If you need to position the tanks farther away from the downpipe, 3P Long Link Kits are available.

The 3P Filter Collector comes in three colors: Black, Brown, and Grey.

Various taps are also available including plastic high-flow and metal bib versions in either Chrome or Brass finish.
