

# 3P Technik Rain-Tank Systems

with Filter-Collector, Automatic Pump and all Accessories

## Above Ground Rainwater Storage System

A durable, premium quality garden system for rainwater storage and pumping. The Rain-Tank System is a practical alternative to underground rainwater systems.

**Large 800 litre capacity Rain-Tank** with tap and holesaw set. Its attractive modern design has a small space saving footprint. Tanks are available in 4 finishes: British Racing Green, Granite, Sand or Black. This allows you to select the best colour to suit your garden.

**Powerful Automatic Pump** with Pump to Tank Connector, and multi hoesail outlet.

**Self-cleaning Filter** for diverting filtered rainwater sideways into the Tank, while leaves and debris continue down to the drain. The highly efficient rainwater filter is easily installed on the down-pipe. When the Rain-Tanks are full the Filter-Collector automatically sends excess rainwater to the drain as usual. The Filter-Collector's unique removable filter cartridge can be taken out in seconds for seasonal cleaning.

**Tank to tank connectors** in multi-tank systems. By clever design each Tank can be easily linked to the next using a sturdy 25mm hose between metal threads.

**Sight Gauge** for quick visual indication of the water level in the Rain-Tanks.

**Rain Tanks are available in Green, Granite, Sand or Black**

## 3P Rain-Tank System Specification

Dimensions: 800mm x 600mm x1790mm

Weight: 40kg

Material: PE (Polyethylene)

The dimensions given are a close approximation and not 100% exact due to tanks flexing – they may vary very slightly.

Sight Gauge and Hi-Flow tap (3/4") for faster filling of watering cans included

3P Filter-Collector for optimum filtered rainwater quality

Fully waterproof (and submersible) pump delivers up to 3000 litres/hour

Easy-fit pump connection point with

Systems can be expanded at anytime with the addition of further tanks

## System Size Options

Any multiple of 800 litres is available.

Typical system sizes;

800 litre (1 tank)

1600 litre (2 tanks)

2400 litre (3 tanks)

3200 litre (4 tanks)
